

Vaishnavi Buradkar

Cloud & DevOps Engineer with 3.7 years of experience in automating AWS infrastructure, building scalable CI/CD pipelines, and managing Kubernetes-based container platforms. Adept at using Terraform, Jenkins, Docker, and Ansible to accelerate delivery and ensure system reliability. Passionate about cloud-native architecture, observability, and DevOps best practices.

EXPERIENCE

Capgemini

Cloud Engineer

Dec 2020 - Aug 2024

- Built CI/CD pipelines with **Jenkins**, **Docker**, and **Kubernetes**, reducing deployment time by 40%.
- Automated **AWS infrastructure** provisioning using **Terraform** and **Ansible** for consistent, scalable deployments.
- Set up monitoring with **Prometheus**, **Grafana**, and **Alertmanager** to enhance observability.
- Deployed **Node.js** and **Java** apps on **Kubernetes** using **Helm** with seamless rolling updates.
- Cut cloud costs by 20% via **AWS resource tracking** automation using **Bash scripting**.

EDUCATION

Government College Of Engineering Chandrapur

Bachelor of Engineering - 8.37

June 2016 - June 2020

Major Projects: ML-based Disease Prediction System, Online Hotel Management System

PROJECTS

Terraform AWS Infra Automation [🔗](#)

Automated VPC, EC2, RDS, IAM setup using modular Terraform code. Reduced manual errors by 60% and improved infra consistency.

Node.js CI/CD Deployment [🔗](#)

Built a Jenkins pipeline to build, test, and deploy a Dockerized Node.js app on EC2 with auto-scaling enabled. Improved deployment speed and rollback safety.

Prometheus & Grafana Monitoring [🔗](#)

Implemented Prometheus and Grafana for monitoring K8s clusters. Configured Alertmanager for Slack/email alerts, reducing incident response time by 40%.

Kubernetes Cluster Deployment on AWS [🔗](#)

Deployed a production-grade Kubernetes cluster using KOPS and Helm. Managed microservices with ConfigMaps, Secrets, and achieved zero-downtime rolling updates.

SKILLS

- Cloud: AWS (EC2, S3, IAM, VPC, RDS)
- IaC: Terraform, Ansible
- CI/CD: Jenkins, Maven, GitHub Actions
- Containers: Docker, Kubernetes, Helm
- Monitoring: Prometheus, Grafana, Alertmanager
- OS & Scripting: Linux, Bash, Python
- Version Control: Git, GitHub

CERTIFICATE

AWS Certified Solutions Architect - Associate [🔗](#)
